

HAMILTON TOWNSHIP MUA & WEYMOUTH TOWNSHIP MUA

2021 SPRING HYDRANT FLUSHING APRIL 5TH to APRIL 27TH BETWEEN 7:30 AM - 4:30 PM.

Hydrant flushing removes sediment and provides an operational check of the hydrants. Customers may experience a loss of water

pressure and discolored water during flushing. If the water is discolored, run the water long enough to clear all the pipes in the house. While the water is safe, please avoid washing clothes and consuming water when flushing is being performed in your area. Residents living in Private Developments, Condominiums, or Apartment Complexes should contact their management office or association to find out when flushing will occur in their development.

Obtain a flushing schedule from www.htmua.com or the HTMUA Office (6024 Ken Scull Avenue, Mays Landing) between 8:00 AM - 4:30 PM.
